POLICY-LEVEL INTENTIONS

Thank you. Now, we would like to talk a bit more about SBC implementation with mass media for family planning. Most SBC programs strive for high quality programming. We have identified a set of attributes (or core components) that may be used to design and implement mass media approaches for family planning with high quality. However, we recognize that the actual practice may look different depending on the context, need, and implementer. Sometimes implementers need to adapt or modify a practice to fit their circumstances, including challenges they may encounter. We would like your assistance to understand how you are implementing mass media approaches.

For each core component, we have a list of standards that implementers may use to define quality. Let’s work through this list of standards together and discuss how your organization approaches them. For each standard, I will ask you how much **emphasis your program actually places on that standard**. For this, please indicate if this is no emphasis, minor emphasis, moderate emphasis, or major emphasis. Then, I will ask questions to understand **what your organization does to meet the standard**. I will also ask you to share relevant documentation to help me better understand what you are doing, but I will follow up with you after this discussion for these materials. Let’s begin!
